

EXAM FISCA 2011

2011

1. Calcul de IR de 2007, [CM = 0]

$$RG = 50\,000 + 40\,000 + 15\,000 = \underline{105\,000}$$

$$NGI = 105\,000 - \text{Ded / Rev} = \underline{105\,000}$$

$$RT = (105\,000 \times 34\%) - 17\,500 = \underline{18\,500}$$

Repartition entre IR/RP et IR/AR

$$\begin{array}{l} 18\,500 \longrightarrow 105\,000 \\ \text{IR/RP} \longrightarrow 50\,000 \end{array} \left. \vphantom{\begin{array}{l} 18\,500 \\ \text{IR/RP} \end{array}} \right\} \text{IR/RP} = \frac{18\,500 \times 50\,000}{105\,000} = \underline{8803,57}$$

$$\text{donc IR/Exp} = \underline{3523,8} \quad \text{IR/AR} = \underline{9690,48}$$

$$\text{IR/RP: hors exp} = \underline{5285,72}$$

IR = paye avant la déduction de la déduction

$$3630,48 + 5285,72 = \boxed{14976,2}$$

$$IRN = 14976,2 - \text{Ded} / \text{Imp.}$$

• Ded / Imp.

$$- \text{Imp.} = 15.000 \times 20\% = \boxed{3.000}$$

$$- \text{Charge F.} = \boxed{360}$$

$$\Rightarrow IRN = 14976,2 - 3000 - 360 = \boxed{11616,2}$$

• Calcul de IR de 2008 [CM = 0]

$$RG = 100.000 + 50.000 + 15.000 = \boxed{165.000}$$

$$RNGI = 165.000 - \text{Ded} / \text{Rev} \\ = 165.000 - 0 = \boxed{165.000}$$

$$IRT = (165.000 \times 34\%) - 17.200 = \boxed{38.900}$$

• Séparation entre IR/RP et IR/AR

$$\left. \begin{array}{l} 38.900 \longrightarrow 165.000 \\ \text{IR/RP} \longrightarrow 100.000 \end{array} \right\} \text{IR/RP} = \frac{38.900 \times 100.000}{165.000} \\ = \boxed{23.575,75}$$

$$\text{donc IR/AR} = \boxed{15.324,25}$$

$$\text{IR/Exp} = \boxed{9430,3}, \text{ IR/RP. Hors exp.} = \boxed{14.145,45}$$

• IR a paye avant la déduction de la déduction

$$15.324,25 + 14.145,45 = \boxed{29469,7}$$

$$IRN_{08} = 23469,7 - \text{Ded / Impôt}$$

• Ded / Impôt

$$Int_{07} = 3000$$

$$Ch_{08} = 360$$

$$\Rightarrow IRN_{08} = 23469,7 - 3360 = \boxed{26109,7}$$

• Calcul de IR de 2009

$$CM = (1500/496/4/407) \times 15M$$

$$CM = ((1500000 \times 0,4) + \frac{50000 \times 100}{80}) \times 0,5\% = \boxed{4812,5}$$

$$RG = 200000 + 20000 + 15000 = \boxed{235000}$$

$$RNGI = 235000 - \text{Ded / Rev} = \boxed{235000}$$

$$IRT = (235000 \times 38\%) - 24600 = \boxed{64900}$$

Séparation entre IR / RP et IR / AR

$$\left. \begin{array}{l} 64900 \longrightarrow 235000 \\ \text{IR / RP} \longrightarrow 200000 \end{array} \right\} IR / RP = \boxed{55234,04}$$

$$IR / AR = \boxed{9665,96}$$

$$IR / Exp = \boxed{22093,61}; IR / RP.H_{sup} = \boxed{33149,43}$$

IR à payer avant la contre dépt

$$33149,43 + 9665,96 = \boxed{42815,39}$$

$$IR_{09} = \dots - 360$$

Régularisation de la

$$IR/IRP.H. exp = 33\,140,43$$

$$CM = 4\,812,5$$

$$\text{Excedent de IR/IRP} = 28\,327,93$$

IR à payer avant les autres Déd :

$$28\,327,93 + 9\,665,96 = \underline{37\,993,89}$$

$$IRN_{03} = 37\,993,89 - [3\,000 + 360] \\ = \underline{34\,633,89}$$

2) Oui Mr Alouan a droit d'opter pour le régime forfaitaire en 2008 car il a en 2007 une CA = 600 000 < 1 000 000

3) Calcul de IR à payer en 2008 selon RF :

$$\begin{aligned} \bullet BF &= CA \times \text{Coff de Marge} \\ &= (1\,200\,000 \times 0,6) \times 10\% \\ &= \underline{72\,000} \end{aligned}$$

$$\begin{aligned} \bullet BM &= V.Loc. \times \text{Coff d'impôt} \\ &= 90\,000 \times 2 = \underline{180\,000} > BF \\ V.Loc. &= 300\,000 \times 3\% \\ &= \underline{90\,000} \end{aligned}$$

$$\text{Donc RF} = \underline{180\,000}$$

$$RFI = \underline{120\,000}$$

$$\bullet \text{Addition} = 0$$

$$RG = 180\,000 + 50\,000 + 15\,000 = \underline{245\,000}$$

$$RNGI = 245\,000 ; IRT = (245\,000 \times 32\%) - 24\,100 \\ = \underline{68\,700}$$

$$\bullet \text{Après } IRN = 68\,700 - [3\,000 + 360]$$

$$IRN_{03} = \underline{65\,340}$$

4) Calcul de IR à payer selon le RNS

On a une plusv = 60 000 selon $\frac{2}{3}$ de d (-40 000)
(50 000 - 40 000)

$$RG_{08} = 10\ 000 + 40\ 000 + 15\ 000$$

$$RG_{07} = 60\ 000 + 50\ 000 + 15\ 000$$

$$RG_{08} = 160\ 000 + 20\ 000 + 15\ 000$$

(Même Principe que le RNS)
